PROCESS OF RECRUITMENT

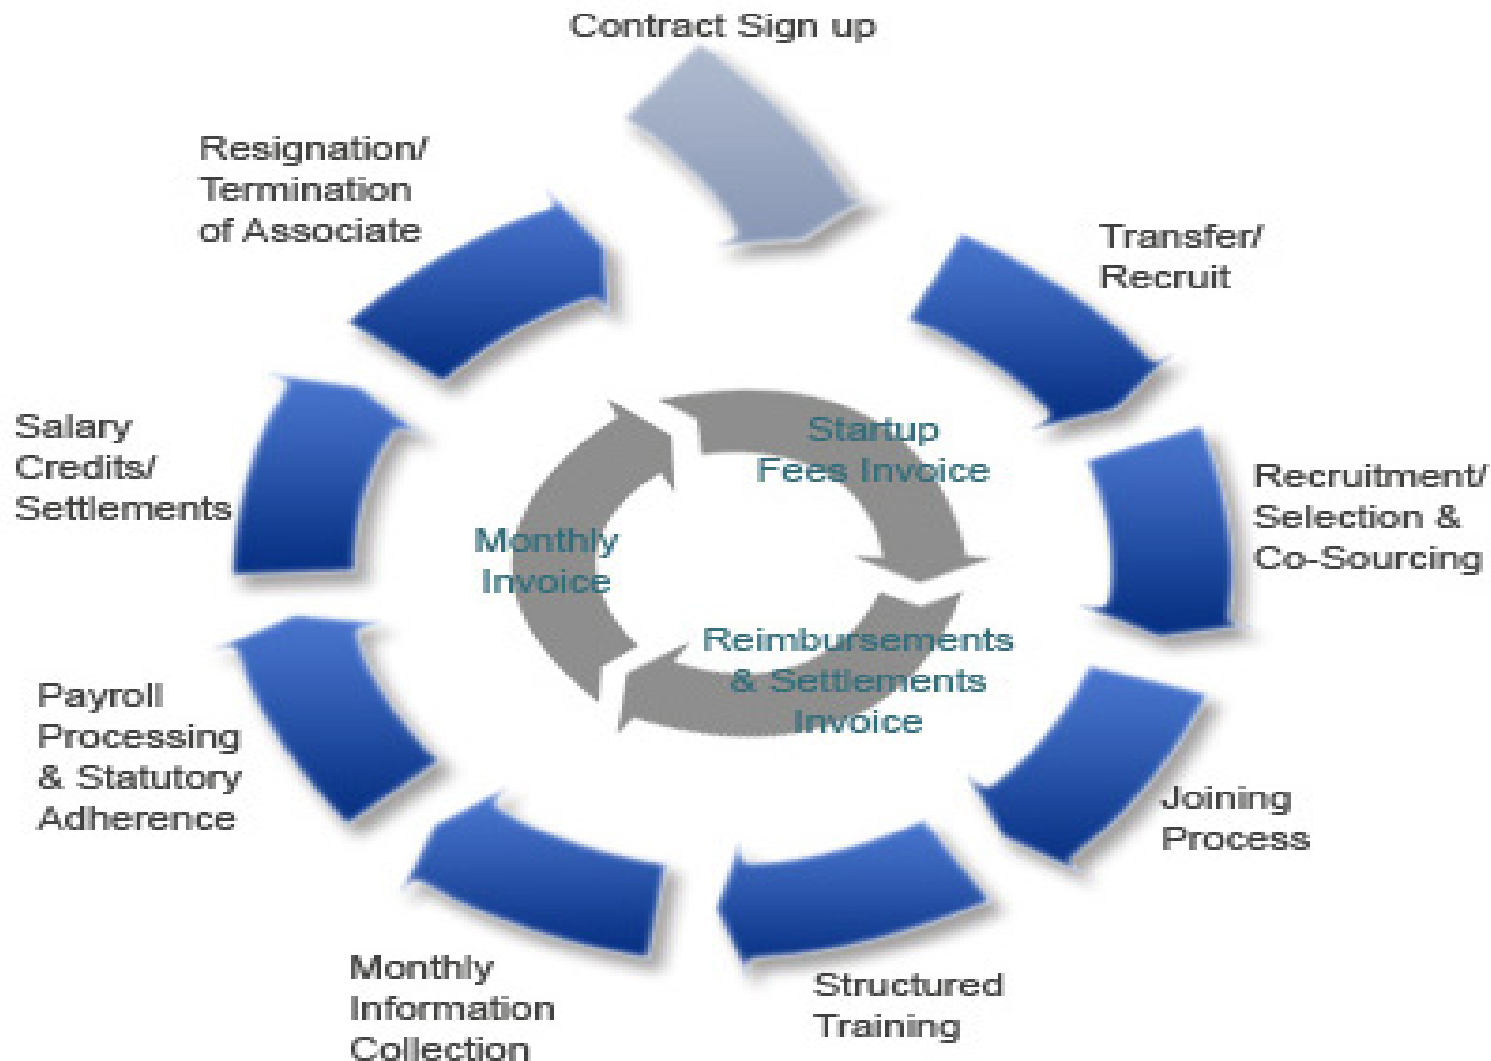

CASE STUDY

HEADHUNTING

- ✓ **Task:** The task was to select and recruit the candidate for the post of Assistant Manager - Processing
- ✓ **Background:** The client is one of the leading players in Food logistics and Supply Chain Management. There was an urgency to fulfill the need of our client and it was difficult to get a candidate, as resumes of such profile were not available on any of the job portals.
- ✓ **Strategy:** To face the challenge, our consultant did industry scanning from where she took out names, addresses and contact numbers of all Cold Storage Processor companies. After that, she short-listed the leading companies in the industry and presented herself as a food technology student who wanted to do Summer Training in their organizations. Initially, there was a lot of disappointment. To overcome the situation, she did mapping for the Assistant Manager's position and started Headhunting. Within a week, she found a candidate with whom she communicated and convinced him for the job profile. The next step was to schedule an interview. She coordinated with the client and the candidate. The interview and the subsequent offer took almost a month.
- ✓ **Conclusion:** We need to do extensive research to get a quality candidate.

TEMP STAFFING CYCLE
